## COURSE PROJECTS (Group Projects)

- B. Tech Main Project: Software for converting handwritten document into digital document

    A software for creating a digital version of handwritten documents was developed as part of the project. It was mainly intended for saving the time it takes to create a digital version by typing the text. The image of the handwritten document is captured and is given as an input to the software which is then processed to generate a digital file.

- B. Tech. Mini project: InfoTip

    Infotip is a web application for issuing and receiving notices within an educational institution. It is mainly intended for making the updated information available for staff and students as soon as possible. Any user needs to create an account by providing their college register number upon which they are assigned a designation. Notices can be uploaded by staff and student representatives. Everyone can view the uploaded notices of their concern. Staff can also record and consolidate students' attendance using this application.

**EXTRACURRICULAR ACTIVITIES**
